Subject: Deny Phillips 66 Railspur project

Supervisor Compton

I am a homeowner in Cypress Ridge on the Nipomo Mesa which is in your district. I was told you had heard from very few people asking you to vote no when it comes before the board. There are a large number of people in Cypress Ridge who note that we live within the blast zone 1 mile from the railroad tracks at the base of Halcion. There are several physician who will tell you how dangerous the diesel fuel fumes will be from Idling diesel engines 24 /seven and a prevailing West wind. I think you will find thousands of letters from all the over the Mesa at the planning department so I would encourage you to ask them for copies and you will see that the people with children and the elderly with potential lung problems are a large group. You've already showed no concern for the ATV particulate dust for the Mesa so I would hope that you would know that this project only adds to the already dirty air.

I know you can't be too proud of being a supervisor for the worst air quality of any district in California.

I support your interest in agriculture and business as I am a businessman. Please respect and support my need for Clean Air and a safe and healthy environment. With the thousands of documents on file from so many cities and so many communities asking this board to deny this project I can't believe any sane supervisor could ever go on record to approve the disaster created by the Phillips 66 rail spur project.

Thank you for voting NO

SR Fisher
