LLK (Lloyd Kerrobert) is similar, though not identical, to LLB (Lloyd Blend). LLK is a conventionally produced heavy sour crude (21 API gravity, 3.1 wt% sulphur) gathered to the east and south of Lloydminster on the Manito Pipeline system for delivery to the Kerrobert station on Enbridge Pipeline Inc's mainline system. The Manito Pipeline gathers from many production sites and truck terminals, and is operated by Plains Midstream Marketing Canada.
