

# Tranquillon Ridge Oil and Gas Development Project

County EIR#: 06EIR-00000-00005  
State Clearinghouse #: 2006021055

Prepared For  County of Santa Barbara Planning & Development

Prepared By  Agoura Hills, CA

## Volume I - Main Document

# Environmental Impact Report

- County of Santa Barbara Transmittal
- Cover Page  
Title Page
- Table of Contents and Acronyms
- Executive Summary
  - ES.1 Introduction
  - ES.2 Proposed Project
  - ES.3 Description of Project Alternatives
  - ES.4 Environmental Setting (i.e., Baseline) Determination
  - ES.5 Impacts of the Proposed Project and Alternatives
  - ES.6 Environmentally Superior Alternative
  - Figure ES-1 Proposed Project Location
- 1. Introduction
  - 1.1 Overview of the Proposed Project
  - 1.2 Objectives of the Project
  - 1.3 Agency Use of the EIR
  - 1.4 EIR Contents
  - Figure 1-1 Proposed Project Location
- 2. Project Description
  - 2.1 General Background
  - 2.2 Proposed Project Description
  - 2.3 Current Point Pedernales Project Operations
  - 2.4 References
  - Figure 2-1 Proposed Project Location
  - Figure 2-2 Proposed Tranquillon Ridge Drilling Map
  - Figure 2-3 Estimated Oil Production for the Tranquillon Ridge Field
  - Figure 2-4 ConocoPhillips Pipeline System
  - Figure 2-5 Proposed Tranquillon Ridge Field Drilling Schedule
  - Figure 2-6 Point Pedernales Total Production Fluids (1987-2006)
  - Figure 2-7 LOGP Block Flow Diagram
  - Figure 2-8 Platform Irene to LOGP 20-inch Oil Emulsion Pipeline Elevation Profile
- 3. Alternatives
  - 3.1 CEQA Alternative Analysis Overview

- 3.2 No Project Alternative
  - 3.3 Alternative Drilling/Production Locations
  - 3.4 Alternative Processing Locations
  - 3.5 Alternative Oil Emulsion Transportation
  - 3.6 Alternative Power Line Routes to Valve Site #2
  - 3.7 Alternative Drill Muds and Cuttings Disposal
  - 3.8 Summary of Alternatives Selected for Further Analysis
  - [Figure 3-1](#) T-R Alternatives Locations
  - [Figure 3-2](#) VAFB Onshore Alternative
  - [Figure 3-3](#) Pipeline Scenario 1
  - [Figure 3-4](#) Pipeline Scenario 2
  - [Figure 3-5](#) Pipeline Scenario 3
  - [Figure 3-6](#) Pipeline Scenario 4
  - [Figure 3-7](#) Pipeline Scenario 5
  - [Figure 3-8](#) Pipeline Scenario 6
  - [Figure 3-9](#) Vandenberg Onshore Alternative, Power Line Scenario 1
  - [Figure 3-10](#) Alternate Power Line Routes
- **4. Cumulative Projects Description**
    - 4.1 CEQA Cumulative Analysis Overview
    - 4.2 Federal Offshore Energy Projects – Reasonably Foreseeable Projects
    - 4.3 State Offshore Energy Projects – Reasonably Foreseeable Projects
    - 4.4 Onshore Development Projects
    - 4.5 References
    - [Figure 4-1](#) Potential Energy Development Projects Located in Federal OCS Waters
    - [Figure 4-2](#) Potential State Offshore Oil and Gas Development Projects
    - [Figure 4-3](#) Location of Cumulative Residential, Commercial, and Industrial Projects -Northern Lompoc Area
    - [Figure 4-4](#) Incorporated City of Lompoc Cumulative
    - [Figure 4-5](#) Orcutt/Santa Maria Cumulative
- **5.0 Analysis of Environmental Issues**
- **5.1 Risk of Upset/Hazardous Materials**
    - [Figure 5.1-1](#) MMS OSRA Probabilities (5) of Oil Spill Impact for Platform Irene and Pipeline
    - [Figure 5.1-2a](#) Sour Gas Pipeline Injury and Fatality Hazard Zones (West)
    - [Figure 5.1-2b](#) Sour Gas Pipeline Injury and Fatality Hazard Zones (East)
    - [Figure 5.1-3](#) Fatality FN Curves: Current Conditions
    - [Figure 5.1-4](#) Injury FN Curves: Current Conditions
    - [Figure 5.1-5](#) Fatality FN Curves: Proposed Conditions
    - [Figure 5.1-6](#) Injury FN Curves: Proposed Conditions
- **5.2 Terrestrial and Freshwater Biology**
- **5.3 Geological Resources**
- **5.4 Onshore Water Resources**
    - [Figure 5.4-1](#) Photograph of Pipeline Route Crossing Small Drainage Feature Near Basin 4
    - [Figure 5.4-2](#) Example of a Catchment Basin (Basin 1) Adjacent to Onshore Portion of the Pipeline Route
- **5.5 Marine Biology**
    - [Figure 5.5-1](#) Seasonal Abundance of Pinnipeds in Waters of Central and Northern California
    - [Figure 5.5-2](#) Intertidal Zonation of a Rocky Shore in Southern California
- **5.6 Oceanography and Marine Water Quality**
    - [Figure 5.6-1](#) Location of Oceanographic Studies Conducted Near Platform Irene
    - [Figure 5.6-2](#) Time-lagged Correlation of Velocity from Near-Surface Moored Current Meters and from Surface Drifters along the Central Coast
    - [Figure 5.6-3](#) Wind Stress Recorded at Buoy 46023 near Platform Irene

- **6. Environmentally Superior Alternative**
  - 6.1 Comparison Methodology
  - 6.2 Comparison of the Proposed Project to the No Project Alternative
  - 6.3 Comparison of Proposed Project to Other Alternatives
  - 6.4 Environmentally Superior Alternative
- **7. Growth Inducing Impacts**
  - 7.1 Removal of an Impediment to Growth
  - 7.2 Economic Growth
  - 7.3 Precedent Setting Action
  - 7.4 Development of Open Space

- 7.5 Conclusion

- **8. Significant Irreversible Environmental Changes**

- **9. Comments and Responses to Comments**

- 9.1 Applicant Comment Letters and Responses
- 9.2 Governmental Agency Comment Letters and Responses
- 9.3 Public Comment Letters and Responses
- Figure 9.3-1 Primary Free Span Schematic Cross Section
- 9.4 Public Hearing Comments and Responses

**Volume II - Appendices**
