Re: Notification letter for Public Hearing and availability of final Environmental Impact Report entitled Phillips 66 Proposed Rail Spur Project.

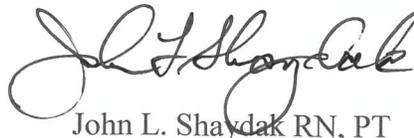

Dear Sir or Mesdames,

First off I wish to thank your office in attempting to notify me of this activity as it may, or may not, negatively impact my property. However, the notification letter arrived at my address fully four days **AFTER** the last date of the public hearing and display of documentation connected to the issue.

It is my sincere wish that your office will, in the future, please send all notices of any import such as this, to arrive at my address fully a week before scheduled hearings or displays of project documentation. As you may imagine my distress at missing this hearing and review of project plans was and is considerable. I am now aware of the project, but, know nothing of the particulars as they may affect me.

Is it possible that some hard information of the hearing and documentation displayed could be sent me? This may enable me to assess any impact of this proposed project in connection to my property. As my property is somewhat adjacent to the railroad right of way the actions revealed by your letter could result in undesirable, or not, changes in our neighborhood. I wish to be informed in a timely manner. Thank you for your valuable time in reading this letter.

Sincerely

John L. Shaydak RN, PT
