RE: Phillips 66 Rail Project

Dear Honorable Chair and Commissioners:

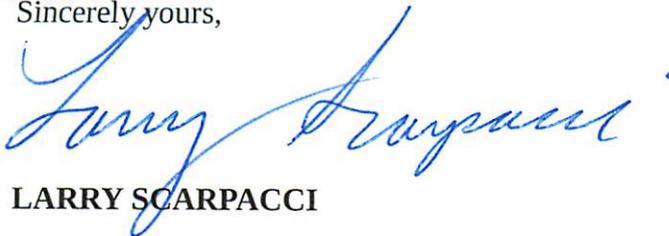

I am one of the millions of residents living within the State of California who presently live within the “**Blast Zone**” of the Union Pacific Railroad system, and I strongly oppose the expansion of the proposed railroad spur in Nipomo, CA.

Any mile and a half long train, filled with potentially explosive oil products, that will be traveling within 200 feet of my house on a daily basis is a very UNSAFE method of transporting oil, and would directly effect my life in Goleta, California. If such an “oil train” should be derailed, it would cause a huge environmental disaster that would cost millions of tax payer dollars while shutting down local businesses along the 101 State Highway.

Please deny this very UNSAFE project!

Thank you very much for your time and consideration of my views.

Sincerely yours,

LARRY SCARPACCI
