Subject: Proposed Rail Project for Phillips 66

Dear Mr. Wilson,

We respectfully submit our comment letter to the proposed project and the DEIR.
Thank you

Re: Phillips 66 Company Rail Spur Extension Project

Dear Mr. Wilson,

We wanted to provide a letter of support for the proposed project and of the Draft EIR. It appears to us that the proposed project provides opportunities for redundancy and options for delivery of resources.

This country was built on opportunities and it's no surprise that the railroad transport of resources and people was a large part of how our country was able to grow stronger. From our research the refinery appears to not only be a good neighbor but a substantive employer for the people in our county, both directly and indirectly. Another aspect that is rather important is the fact that energy independence for our country is dependent on our ability to refine oil to not be overly reliant on other countries. Globally we undertake the regulation of energy transport and handling much more seriously and with many more safeguards than do other countries. Therefore, for considerations at the local level, for our country's energy independence and in consideration of the global environment we support moving this project forward.

AGJ-01

The recirculated Draft EIR appears to be very comprehensive and we see no reason for further delay, it should be moved forward to a final form and allowed to be reviewed for approval.

Sincerely,
THE AGUILAR'S

Jorge and Sandy Aguilar
