Subject: Phillips 66 application

Dear Mr. Wilson,

Please reject the Phillips 66 EIR and project application for a spur track at its Nipomo refinery. We do not want any more oil trains running through our county. The pollution and risk of catastrophic fire present unacceptable risks to the agriculture, businesses and families of SLO County.

Imagine if a fire were to occur anywhere near Diablo Canyon... if it caught on there, it would be impossible to put out and would spread toxic radiation over the country, provoking a difficult or impossible evacuation.

Our children, food and businesses are too precious to risk like this.

Thank you,  
Nancy
