Subject: Phillips 66 Rail Project

Mr. Wilson,

I would like to make the following comments in support of the Phillips 66 Rail Project that is being considered by your office. I feel that the DEIR is both thorough and complete in that it goes beyond the normal scope of CEQA by extending the study area and addressing the concerns of the previous circulation. In addition, I feel that the analysis is more than adequate for moving the document to a final EIR and proceeding to a public hearing without further delay. I urge you to give careful and considerable consideration to the significant benefits this project offers to the San Luis Obispo County economy and the critically important head of household jobs that are dependent on the Phillips 66 operation. In conclusion, Phillips 66 has operated a safe refinery on the central coast for over 55 years, contributing to the local economy and the overall energy independence of our country. Please consider moving this project forward to the FEIR and eventual approval and permitting process.

BLD-01

Thank You,
Daniel Blandford
