Dear Mr Murry Wilson
SLO County Planning Dept

I have serious objections to the railspur project. In view of the looming climate change problem we should do everything we can to decrease pollution, not add to it. The notion of issuing pollution credits was intended to reduce overall pollution; however in this case it would add to the local pollution on the Nipomo mesa which already has unacceptable levels of pollution.

This, in addition to traffic problems from rail traffic, and the hazards of spills and explosions makes the project totally unacceptable to this county.

Sincerely,

Henriette Groot, PhD
