Subject: Phillips 66 rail terminal project

Mr. Murry Wilson, SLO County Planning Department:

I am writing to convey my dismay at the very thought of SLO County approving the Phillips 66 rail terminal project.

Phillips 66 is currently using the pipeline method to transport their crude. This has worked and worked well over the years with minimal problematic impact to SLO county.

We live in a wonderful, picturesque county where we pride ourselves with the beauty and scenic coastal views of our area.

With that said, why, would we want to see our beautiful landscape dotted with 520 (to start) one and a half mile oil tanker cars traveling through our pristine environment annually that present potential chemical hazards, increased noise, traffic and blight to our serene existence.

You have the power to say no. Please support the "NO PROJECT ALTERNATIVE".

Sincerely,

Stephanie Hinson

San Luis Obispo, CA 93408

Mr. Murry:

I am writing in regard to the Phillips 66 Rail Terminal Project.

I live in San Luis Obispo County and am vehemently opposed to the Phillips 66 Rail Project. I have read the REIR and am concerned about the potential for derailments that could harm our peaceful community.

Why would we want to risk a hazardous spill which would potentially destroy our environment for years to come?

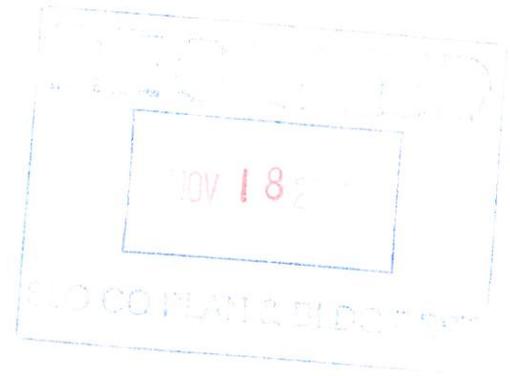

I support the No Project Alternative.

Sincerely,

Stephanie Hinson

Subject: The Phillips 66 Rail Terminal Project

Mr. Murry Wilson, SLO County Planning Department:

I am writing in regard to The Phillips 66 Rail Terminal Project.

The fact that we are even considering this rail project to go through our environmentally sensitive cities is a surprise to me.

Why would we want these potentially hazardous group of 80+ oil tankers, five days a week traveling through our communities? The inevitable spills, the noise, the smell, all don't belong here.

Please protect our environment and say no to this project.

Sincerely,

Stephanie hinson
SLO County Resident
