Subject: Safety of slo county residents

I would like to protest the above Phillips 66 rail terminal project .
I am concerned for ALL SLOcounty residents,not just south county residents.
SLO county does not need over 500 oil trains traversing our county each year.
The rail cars carry flammable liquid and have been deemed unsafe.

Subject: No one benefits from this project except Phillips

Mr Murry Wilson
SLO CO Planning Commission

The main impetus for this project is greed. Phillips wants to discontinue refining the crude it is currently using and replace it with less expensive crude. This will result in increased profits for Phillips, while SLO county loses it's reputation as one of the most pristine counties in the US.

Subject: Increased air and noise pollution for all of SLO COUNTY

Mr. Murry Wilson
SLO CO. Planning Department

520 rail cars, each 1.5 miles long, will traverse SLO CO. each year if this project is approved.
The increase to air pollution from diesel fumes and increased noise pollution will be detrimental to all citizens and visitors of SLO CO and seriously impact the goodwill for which our county is known .

Subject: Tar sands are detrimental to health

Murry Wilson
SLO County Planning Department

As a resident of south county and as a golfer with heart issues, I am very very concerned for myself and others while living and playing golf in this region of the county.

The prevailing winds are known to carry very fine particulate matter to much of south county, which results in many, many days where the state and federal guidelines are exceeded.

To allow tar sands particulates to be added to the already dangerous air quality would be extremely detrimental for those citizens with health issues.
