Subject: Railspur comments

Greetings,

I'm taking this time to comment on the draft EIR for the Phillips 66 Railspur project. With the current safety risks of train transportation of oil and similar flammable products, I am not in favor of moving this project forward. Our community doesn't need this increased risk of explosions and other catastrophic events like what has taken place recently in Canada and other American locations.

JOJ-01

Secondly, this project would significantly increase the production of oil refining in our Nipomo area, and I am not in favor of increasing production. Rather, I'd like to see the plant closed and our precious water be used in other productive ways such as with agriculture. Fossil fuels are a limited, finite commodity, so other sustainable and environmentally friendly alternatives need to be explored and set into motion.

JOJ-02

As it is, the oil refinery contributes to poor air quality in our area, and this increased production and increased train traffic would compound this problem; therefore, I am against this project.

JOJ-03

Thank you for accepting my comments.
