Subject: Railspur

Dear Board of Supervisors

Although I do not live and vote on the central coast I would like to express my concern regarding the concept of rail transport of crude oil and tar sands which will run through many large communities on its journey from Canada to your community. As you must be aware there have been large numbers of rail accidents that have caused environmental disasters along with loss of life.

You are in a position to have an impact on halting this project and potentially saving lives and the environment. Please consider the total picture and vote against the railspur.

LUM-01

I am asking this as a Santa Clara resident who is living close enough to the rail tracks that I could be severely impacted by a spill or explosion.

Michael Lussier
