Subject:P66 Rail Spur Project

Dear Mr. Wilson,

I am writing to you to voice my opinion about the Santa Maria Phillips 66 Rail Project. As a worker of this facility I believe the rail project will bring great opportunities to us as employees but also to the community. I believe that it will bring much needed employment to our community and give people the opportunity of a good career.

That being said I have also lived here all my life. I am the second generation of my family to live here in the central coast. I have 2 children that I am raising and I believe they're going to live most if not all of their lives here. It is important to me to make sure that the things we do will not affect future generations. I could not let my actions impact the lives of other people especially that of my children. That's why I am on board with this project. I don't believe this project will have a negative impact to our city or our environment. After reviewing the plans and talking with people involved in this project I can say that I believe everything will be done to make sure nothing is impacted in a negative way. Every issue that has been brought up seems to have been addressed. I would not stand behind this project if I didn't believe that.

I know people can be hesitant to change and questions or concerns can arise. People should be questioning things that go on in their community, it shows that they care and want what's best. The rail project will help the community by offering jobs and with financial contributions that go back into our communities. I feel comfortable saying that approving this project will better us.

Sincerely,

Abel Mendoza
