Subject: No on Phillips 66 Rail Terminal Project

To: Mr. Murry Wilson,

I would like to be counted among the many residents of San Luis Obispo in voicing my concern and criticism of the mega-oil company neighbor' revised EIR/crude-by-rail proposal.

It is alarming to consider the dangers that 260 annual rail delivered crude 80-car trains will expose not only our beautiful mesa and SLO County but all of the other mainline cities, fields, homes, businesses and natural beauty to unsafe DOT-111 tanker cars. We are all aware of the reported accidents and derailments that have already transpired - and the significant and highly unnecessary business and residential property, environmental and human destruction and long-term effects. We don't want our beautiful agri/tourism rich county to be spoiled forever.

NEN-01

My husband and I moved to Nipomo 1 ½ years ago from 27 years of living in Carlsbad, CA. Why? Because a brief visit to SLO County convinced us that this was the California that we had been looking for - the California that has completely disappeared in Southern California! We have made a significant in a home at Trilogy Monarch Dunes - and delight in the beauty and lifestyle that surrounds us in SLO County. Why roll the dice for a company who waves the employment flag when the reality of the Rail Spur is that additional employment will be minimal.

NEN-02

Also, the refined product is destined for off-shore buyers in Asia - like CHINA. There is no benefit to our County, State or Country to refine unstable Bakken/Tar Sands product... the benefit will be for foreign interests. This is clearly an economic/profit motivated move for Phillips 66.

NEN-03

I would be available to speak personally with any/all of the decision-makers at any time - and I continue to support the NO VOTE on the P66 Railway Spur project. This project is simply not worth the risk. I am so sincerely concerned about the dangers and pollution that would be created, that I can state that we would put our home up for sale and find another place to live. I am one of many, I am certain!

NEN-04

Thank you for allowing me to be heard. Protect our gorgeous Central Coast lifestyle - which really is your responsibility!
