Subject: Rail Spur

Mr. Murry Wilson
SLO County planning Dept.

Dear Mr. Wilson,

I have sat in on meetings and have heard all of the pros and cons of the proposed rail spur. It appears to me, in light of all of the possible and probable repercussions that could and will occur, that no representative of SLO would even consider the proposal contemplated by Phillips 66. From excessive noise, constant lighting, unhealthful air quality, and possible catastrophic accidents, the beauty and sanctity of the central coast will forever be blemished and the health and welfare of all of our residents will be placed in unbearable jeopardy...520 oil tanker trains yearly through SLO will alter the coastline wildlife, tourism, health and tranquility forever more. The test results by Phillips 66 amount to a biased and patently offensive conclusion, in the face of what is actually contemplated by the REIR.

Please stand up and be counted with a resounding NO. We need to preserve the home life we moved to by rejecting all proposals which would endanger all of the land and neighbors around us.

Thank you for your time and consideration,

Joel Nord
