Subject: Phillips 66 Railspur Project

Mr. Murry Wilson,

I thank you for adding my comments to the public record on the Phillips 66 Railspur Project.

I know you have heard many reasons why Davis citizens like myself, as well as others from other areas, have great concerns about the Phillips 66 Railspur Project. My greatest problem with this action is putting people who live or work near the railroad lines at risk for the sake of profit for oil companies, railroads, and oil refineries. These trains travel on tracks marked as "high hazard" rail by our state Office of Spill Prevention and Response. The thought of two daily trains in Davis is repulsive and I understand are over twice as many in Sacramento.

I can't believe you would want your family to be endangered in this way.

I am asking you to reject the Phillips 66 Railspur Proposal.

Thank you for your time and concern.

Sincerely,
Ellen Pontac
