Subject: Phillips 66 oil train proposal

Dear Mr. Wilson,

I am writing to you to urge the San Luis Obispo County Planning Commission and Board of Supervisors to reject the Phillips 66 proposed oil train project at the Santa Maria refinery. I live in Lompoc and am very concerned about the potential health hazards associated with this project.

PRS-01

I have heard and read about derailments of oil trains and the devastation they have wrought. I understand that the rail cars are not built to carry the amount of crude oil that they contain and first responders are ill-equipped to protect the surrounding community when an accident occurs.

The toxicity of the air emissions from spilled oil and Canadian tar sands will cause significant air pollution and health issues such as cancer, heart disease, respiratory disease and premature death, especially for young children and the elderly.

PRS-02

This project is much too risky to undertake and I truly hope you will reject the Phillips 66 proposed rail spur. Please keep California safe.

PRS-03

Thank you for your time and consideration.

Sincerely,
Lauren Pressman
Lompoc, CA
