To Whom It May Concern:

The follow statements reflect some of our concerns regarding THE PHILLIPS 66
RAIL TERMINAL PROJECT:

Air Quality and Greenhouse Gases

The Refining of Tar Sands Leads to A Host Of Major Health Problems

Biological Resources

A Myriad of Impacts On Wildlife, Our Land, Tourism & Residents

Hazards and Hazardous Materials

The Danger of Transporting Crude Oil Down The Cuesta Grade

The Widespread Evacuation Required By A Major Rail Accident

Noise and Vibration

Unacceptable Noise Levels From The New Rail Terminal

Emergency Response Services

Underfunded, Undertrained, Underequipped, Unprepared, Preempted

The Primary Reason To Reject The Project:

The New Risks To Citizens Vastly Outweigh The Benefits To Phillips

SOS-01

Sincerely,

Stephen and Linda Souza
