Subject: Please Reject the Phillips 66 oil-by-rail project

Mr. Murry Wilson
San Luis Obispo County Planning Department

Dear Sir or Madam,

I live in the San Jose area and I am very concerned by the Phillips 66 proposal to bring up to 5 trains loaded with oil per week through my neighborhood.

First I do not want my family and myself to nbear the risks of a catastrophe like the one that took plance in Lac Megantic in Quebec.

But perhaps even more importantly, we are facing an even bigger threat with climate change, which is already causing the worse droughts, floods, and other severe weather events in decades, it is irresponsible to continue to aggravate global warming for the sake of sohrt-term corporate profits. How can we justify this to future generations who will bear catastrophic damage to the environment and the economy to pay for the greed of our generation?

For these and other safety reasons, I urge the San Luis Obispo County Planning Commission and Board of Supervisors to reject the Phillips 66 proposed rail spur. This project creates significant, unavoidable, and unnecessary risks for our communities and our climate.

Respectfully yours,

PED-01
