RE: DEIR

I was unable to make meeting on Dec. 12 2013.

I have lived on Nipomo Mesa for over 50 years----I have terrible lung congestion-
---my Doctor tells me a lot of Nipomo residents have the same problem.

The SLO APCD has a monitoring station near me in Nipomo Community Park----when
I talk to neighbors they tell me it does no good to complain as the rules are
determined by powerful corporation-----I hope that is NOT true.

Nipomo Mesa is down-wind to Phillips 66. I wear a gas mask on bad days.
On Earth-Day 1969 I was asked on TV as a Biology Prof. what the main pollution
source of the Mesa was----Phillips 66 ---this forced them to take the S02 out
of their effluent making a very VERY large pile.

Corporations have taken over America-----citizens need to take it back (like
the tea from the Brits long ago)

COMMENTS:

I live on Nipomo Mesa which is downwind to the refinery. The SM refinery is not currently designed to deal with large amounts of Bakken crude oil. What changes do Phillips 66 plan ???
