Subject: Phillips 66 Rail Spur Project

Dear Mr. Wilson:

We are writing you to express our concern about the Phillips 66 Rail Spur Project and request that you deny its approval. The transportation of highly volatile crude oil by rail within the county is a major "public safety" issue for residents living adjacent to the railroad tracks throughout the region. As you are probably aware, there recently have been numerous rail tank derailments and explosions in the United States and Canada that have killed citizens and caused extensive damage to the environment.

In addition to safety issues, other more important environmental factors affecting the community are noise, light and air pollution from this facility expansion. This will negatively impact the quality of life and health for residents living on the Nipomo Mesa. Therefore, we request that approval of the Phillips Rail Project be denied.

Sincerely,

Rodman N. and Kathryn G. Gibbs
