

COMMENTS ON THE PHILLIPS 66 RAIL SPUR EXTENSION PROJECT DRAFT ENVIRONMENTAL IMPACT REPORT

The following are useful types of comments in addressing the following issues:

- Content of the EIR.
- Methods on how environmental issues are analyzed.
- Potential Alternatives to the project.
- Potential mitigation measures that would avoid or reduce environmental issues.

Under "Mitigations" 7.0, there is ample evidence by the number of times mitigations are allowed "off site" when it comes to air pollution (e.g. AQ 1a - K) or noise levels (AQ 2a →).

HI-1

The neighbors of the project have no protection from violations of air quality and noise level acceptable ranges.

HI-2

Mitigating violations off-site does not protect the health and peace of the community, nor does it protect their property values.

HI-3
