PLANNING & BUILDING

Dear Mr Wilson,

I would like to voice my support for the P66 Santa Maria Refinery train project. I am an engineering contractor who has worked at the refinery for a little more than half a year. The unique combination of pleasant weather, friendly neighbors and encouraging working atmosphere has really made me feel different about this place. People who I have spoken to in the area all have positive comments about the refinery, noting that it has supplied stable jobs and has been actively involved with the community. I cannot envision how the area would look like without a large job supplier like P66.

If I understand correctly, the proposed train rail project will help keep the refinery stay in business and be competitive. To me, it is a no brainer to do the project. The refinery has large undeveloped land to build the new rail out of people's sight. It also has a good history of managing projects and reducing their negative impacts on the community. I am confident that this project would not be any different. KOJ-1

I am only expected to stay here for another year or so before moving on to my next assignment. But I really hope that the area would continue to develop and flourish for the many years to come. Therefore, I truly hope that you would support the project as I do and certify the environmental review.

Sincerely,

James Kong
