Subject:Phillips 66 Expansion Project

Dear Mr. Wilson:

I moved to Trilogy about a year ago and am concerned about the new Phillips 66 Expansion project. The site seems better suited to a resort than a refinery. The expansion seems like a final effort to save a dying and unprofitable business.

We already have certain smells from the existing project, as well as air-quality issues from the dunes and ATVs. I am concerned about increases in traffic, air pollution, water usage, and odors.

I do understand economic realities, but we are creating a good property and future retail tax base with our community and also the surrounding developments.

Thank you for your time and attention to these issues.

Sincerely,

Wendy Nurock
