Subject: Phillips Rail Spur Extension Project

Dear Board of Supervisors:

My husband and I are opposed to the above project. We moved from So Calif. two years ago where we lived in the Torrance area and a few miles from the Exxon Mobil Oil Refinery. We had a warehouse within one mile of the refinery and were constantly inundated with the black residue from the refinery, the noise, the monthly warnings "in case of accident", etc. Who can guess what we were breathing at work and at home?? The refinery spewed black soot and other airborne pollutants, do we want similar situations here in Nipomo or the rest of SLO County? The Nipomo Mesa will certainly get the brunt of the soot and airborne particles carried by the persistent winds.

SJP-1

After reviewing the EIR, we feel that living at Trilogy Monarch Dunes and the expansion of this project would endanger our well being including health issues from already breathing the dunes dust from recreational vehicles. We will consider relocating if the expansion comes to fruition.

We have friends interested in relocating from the South Bay area of Southern California to SLO County, however, they will wait to see what happens with this project before they would even consider relocating here to Trilogy or any nearby subdivisions.

SJP-2

We have a beautiful area here to live and if we can be environmentally forward thinking and get rid of plastic bags, why on earth would you even consider expanding the Phillips Rail Spur Extension???

SJP-3

Yours truly,

Judy and Philip Simmons
