Subject: Phillips 66 rail project

Phillips 66:

I am writing as a new resident of the Nipomo Mesa. I have moved here from LA to be removed from pollutants and emissions. I have acquired cancer twice and went through hell and back to survive.

Now after settling here and to find out of this Phillip 66 project, it will be worse than L.A. At least that city was trying to clean up there acts from the years. Now with the winds here and the ash,soot,diesel emissions (even with the proposed credits),and other pollutants this project can bring, all citizens near this project will die prematurely either from an explosion (which has happened elsewhere) or from all these toxic pollutants landing in the local crops we eat or through the air we breath. How can this be good for anyone except from more greed lining some few recipients pockets?? What a disaster for all good paying SLO county citizens ready to line their coffins. Please take your project elsewhere where no communities of living people will be subject to all the pollutants/poisons.

COB-01

Thank you,

A law abiding citizen who is outraged over this Philips 66 project

Responses to Barb Cosio Comments

COB-01	The increase and potential risk from air emissions from the proposed Project is analyzed in Section 4.3 (Air Quality and Greenhouse Gases) of the RDEIR. The EIR determines that criteria pollutants and toxic pollutants would be emitted at levels that exceed the thresholds and would be significant and unavoidable impacts.
