Subject: reject Phillips 66 spur

The last thing our county needs is an increase in exposure to toxic pollutants. We have Diablo Canyon generating literally tons of toxic waste each year, as well as the particulate dust pollution generated by the OHV's on the Dunes. It will be a long time - if ever - before either of those problems are solved, so please do not add to the problem by allowing a project that has the potential to be so toxic to our health, safety and environment here on the Central Coast.

WHG-01

Respectfully,

Gregory W Wheeler  
2631 Hemlock Ave  
Morro Bay Ca 93442

**Responses to Gregory W. Wheeler Comments**

WHG-01	<p>The RDEIR addresses the potential impacts and recommends mitigation measures for the proposed Project consistent with the requirements of CEQA. Section 4.3 (Air Quality and Greenhouse Gases) addresses GHG emissions, criteria air emissions and health risks.</p> <p>The EIR concludes that emissions of criteria, GHG and toxic pollutants would exceed the SLOCAPCD thresholds and would be a significant impact.</p> <p>The commenter's statement about air issues are included in the FEIR for the decision-makers' consideration as part of the County's deliberations on the proposed project.</p>
