Dear Mr. Wilson,

I am a frequent visitor to Santa Margarita, coming to stay with friends that live one mile from the proposed quarry site. In addition to supporting local business during my visits, I come for the quiet rural life style, diverse bird populations, and star gazing without the presence of city lights (or quarry lights). The area is a treasure to be preserved.

As detailed in the Oster/Las Pilitas Quarry Draft Environmental Impact Report (DRC2009-00025), I strongly support Project Alternative 6.5 (No Project). This alternative allows for continued agricultural use of the project site and creates no other environmental impacts. Project Alternative 6.5 is highly compatible with Residential Rural zoning immediately adjacent to the proposed project site, appropriate for the publically-funded infrastructure within the region, and maintains the rural character of Santa Margarita, CA.

Thank you,  
Karen Lisi
