Subject: RE: Quarry Comments

Hello Jeff,

I received your facts and comments sheet in the mail. I found it somewhat incomplete though. The estimates for water use did not specify their source and did not discuss the most likely location/s of dumping waste water. These things would be great to include if you want more feedback on our communities take on this. Also your fact sheet does not explicitly say if the quarry is on public land or private land which would change many peoples perceptions of this application.

Thanks,
Dominic
