Project Manager, SLO Co. Planning Dept.

I am not against having the Highway 58 Quarry per se. What I am against is not using good judgement in my estimation in regards to road way usage. I feel it is not advisable for truck traffic nor does the state highway dept. which has a sign posted at the beginning of Highway 58 stating that this road is not advisable for truck traffic. So do our state highway signs mean nothing to the general public or is the Planning Commission above taking the advice of the State Highway Dept.

This is the second application concerning the Las Pilitas Area Plan; the first being the grape processing plant on Vista Del Lago which is off the Las Pilitas Road that was o.kayed by the Planning Dept. The Las Pilitas road was built in the late 30's, early 40's and not for truck traffic.

This is scary for us who live on Las Pilitas Road as I am sure it is scary for the residents off of Highway 58.

Thank you for your time and attention.

Charlene Abeloe, 4922 Las Pilitas Road, Santa Margarita, Ca. 805/438/3613
