Re: Oster (Las Pilitas Quarry)

To Whom It May Concern,

We have had the delightful experience of visiting family members that live in Santa Margarita on many occasions. We have grown to appreciate the many aspects which drew them to this location.

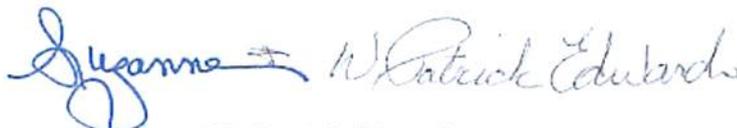

We live in southwest Ohio between Cincinnati and Dayton. Our area is a high traffic, industrial location. We have seen the result of the lack of environmental conscience on the part of our planning commissions. We have always felt the State of California set the gold standard as protectors of environmental concerns and individual rights.

In making your final decisions regarding the Las Pilitas Quarry permit, please take the concerns of the residents to heart. Each resident deserves their transportation safety, health, water rights and quality of life to be your priority.

We look forward to enjoying Santa Margarita in the future and to support the local businesses that reflect the charm of the area.

Thank you for allowing a non-resident and frequent tourist to express our concerns in this matter.

Respectfully yours,

A handwritten signature in blue ink, appearing to read "Suzanne & W. Patrick Edwards". The signature is written in a cursive style with a large initial 'S' and 'W'.
