Comments for: Oster ( Las Pilitas Quarry ) CUP / Reclamation Plan (DRC2009-00025)

This letter is in response to the Oster (Las Pilitas Quarry) CUP / Reclamation Plan (DRC2009-00025) and the devastating impact it will bring to the stated area. I live on the lower Parkhill area and implementation of the Quarry will drastically affect our lives in a few, but destructive ways;

- First point of interest is that many do not have water at satisfactory levels and it would be too dangerous to subject us to lose the water table due to the washing and extracting process.
- Secondly, the mere thought of having 200 trucks a day on these narrow roads would be a major impact on the safety of all who travel these roads day in and day out.
- Third, many of us residents moved out to this area for peace and quiet, to be able to live somewhere without the roar of diesel traffic.
- Fourth, our property values will be subjugated to very low values in an already depressed market.

Thank you for hearing my concerns,

Al Martinez
