---

Department of Planning and Building;

I am a resident of Santa Margarita and am deeply concerned about the impact the Oster Quarry will have on me, my community, and my future family. First, the extra traffic the hauling trucks will generate is not only a noise and traffic concern but a safety one as well. Next, the quarry will use heavy equipment and explosives that create noise, vibration, fugitive dust, and airborne toxins. I also believe the operation will impact the reliability of surrounding water sources because of the large amounts of water the site will need every day for operations. Lastly quarries damage the environment in many ways, and are very unsightly. I am strongly opposed to the Oster Quarry; it will impact our residential and agricultural community in many negative ways.

Thank-you,

Lynne Mastin
