Subject: Las Pilitas Quarry

Dear Mr. Oliveira

Here are our objections to this proposal:

- 1. this appears to be a duplication of product/services available from the SM Kaiser Sand/Gravel;**
- 2. the section of Hwy 58 from the 10 mile bridge to the 5 mile bridge adjacent to the Oster property is one of most scenic in the county with its rich assortment of native plant life. It needs to remain unspoiled for future generations. The Oster proposal would put this in jeopardy;**
- 3. safety--the prospect of 200 trucks leaving the site daily would have a negative impact on emergency vehicles entering and leaving via Hwy. 58, especially from the CF/CoF Parkhill Station;**
- 4. unnecessary wear and tear on the new 5-mile bridge and Hwy 58;**
- 5. run-off into the Salinas River from erosion caused by on-site heavy equipment activity;**
- 6. air quality concerns from the blasting, heavy equipment work, and truck traffic; and,**
- 7. the effects of blasting on the neighbors of the site as well as the wildlife.**

Jack and Chris Mitchell--34-year residents of Hwy 58/Huer Huero area
