

My name is Jennifer Morgan I have lived in Santa Margarita for almost two years, I have lived in the San Luis Obispo County going on 4 years. I have never voiced my opinion for something like this before but I feel like this will affect my life and my future family's life. I was Born and raised in San Jose, Ca. I grew up riding horses and doing 4-H, It was so hard for me to grow up and have the opportunities to do these things because of traffic, overcrowding and general LACK of open land and space. As an animal lover and lover of open land I feel it is my duty to say something. I am not one to Complain and I realize that the world is growing BUT..... Santa Margarita is the town of my dreams! In San Jose houses and communities by the DUMPS and QUARRYS are; shunned upon, trashy, getto, and just plain no good. I want to live here the rest of my life, I want to drive highway 58 without trucks and trailer loads all around, I don't want to see land being blown open like a bad wound because of what GREED.

If rocks fall off of trucks and crack my windshield are they paying for it?

Many bicyclists ride this road and as much as it drives me crazy to swerve around them how can a rig full of material do that? Will they pay to widen Highway 58 to make it safer? How many more accidents will happen on 58 because of more traffic?

Those trucks are soo heavy the wear and tear on the road will happen so much faster.(and the road is bad already.)

Santa Margarita is beautiful people move out here to get away, to rest, to really live their lives. Bringing a large industrial company I feel will have catastrophic damage and I feel will and could be the biggest mistake ever to this town.
