Comment: I am extremely concerned regarding the Oster Quarry application. ① First is the safety hazards the trucks may cause during their movement of materials since the major road (58) is so narrow + has poor visibility in some areas. ② Water levels are very low. Removing further water could severely affect the aquifer leading to residential diminishment of water supply both now + in the future 30 yrs. In an area where water is so limited, resale of homes could be severely affected with people unable to sell their property. ③ Why is there a need for a new quarry when 2 exist nearby. ④ Impact on wildlife is another major concern.
