I have the following concerns:

- *Upon leaving the Oster property where will the trucks enter onto Hwy 58, certainly not at the center drive between his residence and his rental at the blind curve where Mr. Oster enters the area now
- *What does the county plan to do about A truck every 2.4 minutes entering Hwy 58
- *Will Hwy 58 have 3-4 lanes before operation begins
- *Who will pay for the widening or work that will have to be done on Hwy 58, certainly not the tax payers
- *Has an Environmental Impact Report been completed yet
- *What affect will this have on the surrounding wildlife
- *I currently commute 30+ minutes each way to work now what an additional 15+
- *How much traffic impact will this have on Pozo Rd for those of us that will take a longer alternate route to avoid the danger
- *Has anyone heard of a drought and where will the water come from and what will happen to the surrounding wells when ground water is removed at this rate
- *Blasting what about the surrounding neighbors and how far mileage wise will this be heard
- *Will there be limitations on hours of blasting
- *Who will compensate those of us that decide to move from the Margarita area to avoid this dangerous and noisy situation
- *Oster will pay maintenance from his residence to Hwy 101 from damage to roads not the tax payers right
- *What about those of us that have health issues already that the dust and toxins will create more health concerns for
- *Those of us that live in the Margarita area do so for the quiet peaceful life which will be destroyed
- *How many accidents or deaths will this operation cause

My concerns are the obvious. The dangerous driving conditions (it's not like a semi has not pulled out in front of traffic on El Camino with the attitude they'll stop), longer commute, noise, dust, toxins that will effect my health as well as my husband more. I object to the project in a location which will have such an impact on the entire surrounding residences as well as community.
