Subject: Highway 58 quarry

Dear Planning Commission members,

We urge you to deny the request by the Las Pilitas LLC and Oster Living Trust to build a quarry on Highway 58.

This is a quiet rural area and a operation of this magnitude will contribute much noise and dust. A great deal of water will have to be used from a area that is allready short on water.

200 trips a day are planned. This is a narrow winding road with normally very light traffic. 200 trips a day translate into a truck every few minutes. A slowdown in traffic would mean a long steady stream of trucks. These trucks usually travel too fast for conditions and would create a additional traffic hazard.

We feel that this projects would be a detrimint to the local residents.

Thank you, Larry and Carolyn Wright
