Re: Chevron Avila Point Project – 2015 Application Update

Dear Ryan:

Chevron Land and Development (CL&D) submitted an initial application in December 2012 for a project to remediate the Avila Tank Farm property and obtain entitlements for a resort development.

Enclosed are updated application materials, supporting information and a check for the Land Division Application fees of \$23,546.00. These materials should provide the information you need to initiate the CEQA process and hold the Scoping meeting.

My project team and I look forward to working with you on this project review and approval process.

Sincerely,

A handwritten signature in black ink, appearing to read "William Almas", written over a horizontal line.

William Almas
