

**TAC Special Meeting – July 30, 2007**  
**Announcements from the Chair**

The purpose of today's special meeting is to discuss what role the TAC will assume after we submit our final report on the pros and cons of the wastewater projects that will be presented to the Board of Supervisors by the County Project Team.

However before we can decide what tasks we would like to pursue we need to understand what the Project Team will be doing and what they would expect to see the TAC pursue. Our meeting schedule has been extremely intense since we first formed in March and hopefully we will get some respite.

In responses to questions that the committees have asked the Project Team it has been eluded that there will be a final report issued which would correct some of the information contained in the Draft fine Screening Report. It would be helpful to us if we knew whether that report is just an update of the fine Screening Report or if it will contain new information that the TAC needs to consider.

With that I would like to have the Project Team kick off our meeting.

Presented by  
Chairman Garfinkel
