Contributing author in:

Preliminary Engineering Evaluation, Los Osos/Baywood Park Community Drainage Project for CSA 9J, 1997

General Experience:

Over 50 years of experience in the application of geology and other physical sciences in exploration for oil and gas, and the solution of issues related to the proper siting and design of residential and commercial structures and public works including:

- A broad range of environmental documents (EIR's, supplements, addenda, initial studies, etc.) and sections of those reports.
- Planning elements based in the physical sciences (Seismic Safety, Safety and Noise)
- Environmental constraints analyses, particularly for projects having major geological or other physical sciences concerns.
- Expert testimony in the fields of geologic hazards and water resources.

Statements:

1. Why do you want to serve on this committee?

We have lived in Los Osos for more than 26 years, and while we do not reside in the Prohibition Zone, our children own several properties in the area proposed to be sewered. In addition, I have been involved in the project for more than 20 years in capacities ranging from environmental consultant to the County for the first 5 years, to committee volunteer after jurisdiction shifted to the CSD. I believe that I have the training, experience and time to be of service in developing the pro-con analysis described in the County's letter for applicants.

2. If appointed, are you willing to participate in the majority of meetings each year and, if necessary, in numerous related meetings of subcommittees? YES

3. Should you be appointed, are you willing, if necessary for that particular body, to file a statement of disclosure as a public official under the standards set forth by the Fair Political Practice Commission? YES

OFFICE USE ONLY

Date called/interviewed _____ Recommended for appointment ___YES ___ NO

Appointee prefers not to have address or phone number published ___YES ___ NO
