Subject: Coastal Development Permit (CDP) A-3-SLO-09-055/069 Condition Compliance

Dear Mr. Ogren:

As you know, on June 11, 2010, the California Coastal Commission approved CDP A-3-SLO-09-055/069 for the construction and operation of a community sewer system, including a treatment plant, collection, disposal, and reuse facilities, and all associated development and infrastructure. CDP A-3-SLO-09-055/069 was subject to five standard and nine special conditions, including three conditions that needed to be satisfied prior to commencement of construction (Special Conditions 1, 3, and 5) and one condition that needed to be satisfied prior to construction of the treatment plant. The purpose of this letter to inform you that the pre-construction conditions have been satisfied (other than the prior to construction of the treatment plant condition) and you are clear to proceed with initial construction pursuant to the CDP. If you have any questions, please contact Daniel Robinson at the number and address above. We look forward to continuing to work with you on the project and the ongoing CDP requirements moving forward.

Sincerely,

A handwritten signature in black ink that reads "Dan Carl".

Dan Carl
District Director
Central Coast and North Central Coast Districts
