

Condition 32**Traffic Management Plan**

Prior to construction, a traffic management plan shall be prepared for review and approval by the County of San Luis Obispo Traffic Department in consultation with the Planning Director. The traffic management plan shall be based on the type of roadway, traffic conditions, duration of construction, physical constraints, nearness of the work zone to traffic and other facilities (bicycle, pedestrian, driveway access, etc.). The traffic management plan shall include:

- a) **Advertisement.** An advertisement campaign informing the public of the proposed construction activities should be developed. Advertisements should occur prior to beginning work and periodically during the course of project construction. The advertising shall include notification of changes to bus schedules and potential changes to bus stop locations, potential impacts during school drop-off and pick-up times, and major intersections that may be impacted during construction.
- b) **Property Access.** Access to parcels along the construction area shall be maintained to the greatest extent feasible. Affected property owners shall receive advance notice of work adjacent to their property access and when driveways would be potentially closed.
- c) **Schools.** Any construction adjacent to schools shall ensure that access is maintained for vehicles, pedestrians, and bicyclists, particularly at the beginning and end of the school day.
- d) **Buses, Bicycles and Pedestrians.** The work zone shall provide for passage by buses, bicyclists and pedestrians, particularly in the vicinity of schools.
- e) **Intersections.** Traffic control (i.e. use of flag men) shall be used at intersections that are determined to be unacceptably congested due to construction traffic.

Evidence of compliance:

A Traffic Management/Control plan was prepared for the Los Osos Water Recycling Facility Project. The Traffic Control plan is intended to guide the contractors work to insure traffic circulation and access to properties near work sites during the course of project construction is maintained in an orderly and safe manner. The Traffic Control Plan is contained within Section 01571 of The Los Osos Water Recycling Facility Project Specifications (Contract Documents). Provisions as provided for in the project specifications for Advertising, Property Access, Bicycles and Pedestrians are summarized below but their complete text can be found in the following sub-sections of the specifications, which are attached hereto:

a) Advertising:

Sub-Section 1.07 A thru F outlines the responsibilities for advertising and notification of the project. Notification of the project will include:

- Notifying all emergency services and regional transit (if applicable) at least 3 working days prior to beginning construction.
- Written notice to residences and businesses a minimum of 72 hours in advance of performing any construction work.
- Signage including portable electronic changeable message signs at beginning and end of widening Los Osos Valley Road to inform the community of the anticipated work duration, that traffic is subject to delays and other pertinent information. Advisory signs will be posted 10 days prior to construction.

b) Property Access:

Sub-Section 1.06 states that emergency services access to all residences and businesses will be maintained at all times and that local property access and access to existing public cross-streets will also be maintained.

Sub-Section 3.05 requires the contractor to maintain access to all private driveways, however, should the need arise for any driveway to be closed for more than 8 hours, the contractor is required to have given the property occupant at least a three day notice of the pending driveway closure prior to the closure.

c) Schools:

There will be no construction adjacent to schools.

d) Buses, Bicycles and Pedestrians:

Sub-Section 1.01 requires the contractor to provide the work, to ensure public safety, and minimize traffic impacts and delays. Including, impact minimization and safety to pedestrians and cyclists.

Sub-Section 3.04 A requires the contractor to maintain pedestrian access at all times.

Sub-Section 3.04 C requires the contractor to provide access to bus stops at all times or provide temporary bus stop location and signage.

e) Intersections:

Traffic control plans (specs) were prepared for intersections along Los Osos Valley Road. The traffic control plans (specs) are attached hereto and incorporate signage, barricades, flashing signs and flag men.

Condition Satisfied
