

# EMERGENCY PLANNING FOR SCHOOLS & CHILDCARE PROVIDERS

The information in the Nuclear Power Plant Emergency Planning for Schools & Childcare Providers brochure is designed to help your staff, faculty, and students prepare for a potential emergency at the Diablo Canyon Power Plant as well as other types of emergencies we may experience in San Luis Obispo County.

This material is only a small snapshot of the emergency planning efforts that are conducted throughout San Luis Obispo County on a regular basis. The Federal Emergency Management Agency's (FEMA) Radiological Emergency Preparedness program assists state and local governments in the development and implementation of radiological emergency preparedness activities for areas with commercial nuclear power plants.

Emergency alert radio signals are broadcast by the National Oceanographic and Atmospheric Administration's (NOAA) Nations Weather Service (NWS). These radio signals are not available over AM/FM radios but are received by NOAA weather radios. Weather alert radios can be used to alert the public of any emergency, not just weather events. During an emergency at the Diablo Canyon Power Plant, EAS messages would also be broadcasted over NOAA weather radios.

The contents of this booklet may be used to help your facility establish an emergency plan to keep children safe while in your care. Please review the contents of this booklet carefully and, if you have not already done so, develop an emergency plan for your facility.

**To assist in the County's emergency planning efforts, we request you to complete and return the response card. This information is kept confidential and may be used to contact you during an emergency.**

If you would like additional copies of this booklet or have any questions related to this material, please contact the San Luis Obispo County Office of Emergency Services at (805) 781-5011.
