<tbody>
<tr>
<td><strong>1. CALL TO ORDER</strong></td>
<td>Marshall Ochylski, serving as the Chair, called the meeting to order at 1:30 p.m. and led the Pledge of Allegiance.</td>
</tr>
<tr>
<td><strong>2. PLEDGE OF ALLEGIANCE</strong></td>
<td>Ray Dienzo, acting Clerk, called roll to begin the meeting. Director Bruce Gibson, Director Marshall Ochylski, Director Bill Garfinkel, and Director Mark Zimmer were present.</td>
</tr>
<tr>
<td><strong>3. ROLL CALL</strong></td>
<td></td>
</tr>
<tr>
<td><strong>4. BOARD MEMBER COMMENTS</strong></td>
<td>Director Zimmer provided an update on Golden State Water’s current two key projects. The water company is bringing ion exchange treatment to one of their plant site facilities. They have entered into a contract and the equipment is being manufactured off site; they are currently going through the permitting process.</td>
</tr>
<tr>
<td></td>
<td>Director Garfinkel requested that, on the next agenda, the committee discuss forming a JPA in order to obtain the necessary legal status to apply for Proposition 1 and other state grants. Mr. Garfinkel also suggested signing the memorandum to join the Regional Water Management Committee.</td>
</tr>
<tr>
<td></td>
<td>Chair Ochylski informed the Board that the Chromium levels were not exceeded in any of the water delivered to their customers. Mr. Ochylski also expressed concerns by the LOCSD board for the BMC budget approval and discussed the issues to be resolved, namely in kind services and legal consults.</td>
</tr>
<tr>
<td><strong>5. CONSENT AGENDA</strong></td>
<td></td>
</tr>
<tr>
<td><strong>5a. APPROVAL OF MINUTES FROM January 5, 2016 meeting</strong></td>
<td>Public comment</td>
</tr>
<tr>
<td></td>
<td>Keith Wimer expressed concern over the inaccurate representation of his comments on items not on the agenda regarding conservation; requested more detailed minutes to include BMC member comments and video recording of meetings.</td>
</tr>
<tr>
<td></td>
<td>Lynette Tornatzky requested a correction in the spelling of Karen Venditti’s last name.</td>
</tr>
<tr>
<td></td>
<td>Richard Margetson requested corrections be made with respect to his comments from the previous meeting.</td>
</tr>
<tr>
<td></td>
<td>It was clarified that the requests for corrections would be met, and comments on the previous minutes would be corrected as discussed.</td>
</tr>
<tr>
<td></td>
<td>A motion was made by Director Gibson to approve the consent agenda. The motion was seconded by Director Zimmer and carried with the following vote: Ayes: Directors Zimmer, Gibson, Ochylski Nays: None Abstain: Director Garfinkel Absent: None</td>
</tr>

Rob Miller, interim Executive Director, gave a brief summary on the responses provided for the Sierra Club’s inquiries. He discussed the potential outcomes if infrastructure programs are unable to stop seawater intrusion, stating that the judgment requires parties to evaluate the effectiveness of the plan periodically and implement measures to mitigate seawater intrusion. Such measures may include mandatory reductions in pumping and responses to physical conditions. Mr. Miller encouraged members to read through the responses to the Sierra Club.

Mr. Miller also briefly discussed the County’s growth management ordinance process, which goes to the Board of Supervisors on May 17, 2016, and provided an update on the zone of benefit process. Mr. Miller announced that they are currently evaluating three proposals from prospective grant consultants and intend to bring back a recommendation at the next meeting. He additionally noted that meeting postings are to be improved and audio of the meetings is available online.

Member Gibson inquired about the zone of benefit proposal timeline and progress, to which Executive Director Miller provided clarification.

Member Zimmer commented on the audio quality and responses to the Sierra Club’s questions. Member Ochylski inquired about the components of the annual report, and Mr. Miller stated that the initial report would primarily consist of background and policy information.

**Public comment**

Keith Wimer - the Sierra Club is not yet prepared to announce its position and listed their key points of agreement, as well as continuing concern.

Lou Tornatzky requested that the chapter of the Sierra Club be identified and presented with the questions.

Patrick McGibney expressed his concern over the need for more public participation and discussed conservation measures.

Karen Venditti expressed her concern over the lack of mandatory monitoring for agricultural and private wells.

Lynette Tornatzky commented on the potential issues that may arise in trying to get video recordings of meetings to reach the public; homes need Charter cable to get the video.

Richard Margetson expressed his interest in having video recordings of meetings and proposed that community donations could be used to make up for the lack of funds in the budget to pay for these recordings.

Director Gibson made a point of clarification on the Proposition 84 Grant.

A motion was made by Director Gibson to receive and file the report. The motion was seconded by Director Garfinkel and carried with the following vote:

- **Ayes:** Directors Zimmer, Gibson, Ochylski, Garfinkel
- **Nays:** None
- **Abstain:** None
- **Absent:** None

Mr. Miller discussed the technical aspects of the annual report. The report is to include a compilation of the available data for 2015, such as the analysis of seawater intrusion, information regarding the groundwater available in storage, and the groundwater contours. He also discussed the costs associated with putting together the report and the timeline of budget approval.

A question was posed regarding the costs in subsequent years and responded that the costs would be projected to go down.

**Public Comment**

Keith Wimer inquired about additional monitoring to fill gaps, and Executive Director Miller agreed that this is a high priority issue that may find funding on the county level.

Lou Tornatzky expressed his support for the proposal as well as his concern over the costs in subsequent years.
A motion was made by Director Zimmer to approve the proposal for hydrogeologic services. The motion was seconded by Director Gibson and carried with the following vote:

Ayes: Directors Zimmer, Gibson, Ochylski, Garfinkel
Nays: None
Abstain: None

Caroline Berg, County Public Works Water Resources Division, provided a brief update since the last discussion and discussed the proposed approach moving forward. The County staff has explored a basin boundary modification and conducted the necessary public processes. The County held a public workshop to discuss the draft technical memorandum and has received initial feedback from DWR. Ms. Berg called the BMC’s attention to two major items: (1) When the state is considering basin boundary modifications, it is their responsibility and to their discretion to decide what basins and sub-basins are modified and whether or not certain requests might create new sub-basins; (2) There are slight differences from the final court order plan area, and the County is proposing to seek a basin boundary modification request supported by scientific data, but ask DWR to consider the request within the context of the adjudication.

Member Ochylski asked for clarification regarding parcels, to which Carolyn Berg responded and added details on the timeline to send the request to the County Board of Supervisors.

Public Comment

Lou Tornatzky expressed his support and asked for further details on the timeline for approval. Ms. Berg explained the process and deadlines and stated that the decision should be delivered by the end of the year.

A motion was made by Director Gibson to approve the recommendation. The motion was seconded by Director Garfinkel and carried with the following vote:

Ayes: Directors Zimmer, Gibson, Ochylski, Garfinkel
Nays: None
Abstain: None

Executive Director Rob Miller briefly reviewed the technical aspects of the Los Osos Creek Discharge project. Regulation can follow one of two paths: (1) a method of disposal as part of a wastewater project, or (2) a method of groundwater recharge and replenishment project. The regulation of each of these methods differ under Title 22, and is dependent on travel time, dilution water, and credit in soil for removal of contaminants.

Concerns over cost and annual yield, as well as the next steps in the process were discussed. A proposal and recommendation will be brought to the next meeting.

Public Comment

Jeff Edwards expressed his support for the project, posed some questions and made recommendations.

Lou Tornatzky expressed his support for the project. He suggested the BMC also look into grant opportunities to fund the project.

Keith Wimer expressed support and suggested the use of blended water as well as the treatment of the project as a replenishment project to ensure that the water reach the wells.

Karen Venditti expressed her preference for the creek discharge program over the previously proposed dry farm discharge project. She also commented on concern for costs associated with treating the water.

Lynette Tornatzky commented on emerging contaminants.

A motion was made by Director Garfinkel to revisit the item on the next meeting’s agenda. The motion was seconded by Director Gibson and carried with the following vote:

Ayes: Directors Zimmer, Gibson, Ochylski, Garfinkel
Nays: None
Abstain: None
Absent: None
| 8. PUBLIC COMMENTS ON ITEMS NOT APPEARING ON THE AGENDA | Linde Owen requested the cessation of drawing from the basin for outdoor water use. She suggested a long term method to reuse septic tanks or imported water from effluent or upper aquifer. She also urged for no more growth of the water systems’ distribution of water.

Keith Wimer voiced the Sierra Club and LOSG’s commitment to conservation and reuse programs and expressed discontent for the County’s efforts with regards to conservation. He requested that the BMC pursue a discussion of conservation and how it can be maximized in the near future as an action item on the agenda for the next meeting.

Karen Venditti offered to volunteer for outreach to Los Osos community members regarding the costs associated with repurposing septic tanks. She also expressed concern over the lack of mandatory monitoring of wells.

Richard Margetson commented on the water allocations for dry land farmers. |
