INNovation

• What is Innovation?
  • Innovation is focused on learning, not on implementation.
  • Innovation funds are used for developing models, testing the models, and communicating the results.
INNovation

An innovative project contributes to learning by doing the following:

• Introduces a brand new mental health practice or approach including Prevention & Early Intervention (PEI)
• Makes a change to an existing practice in the field of mental health, including application to a different population
• Introduces a new application or adaptation to the mental health system that has been successful in a non-mental health setting
INNovation

Innovation must include one of the following primary purposes:

• Increase access to underserved groups
• Increase the quality of services, including better outcomes
• Promote interagency and community collaboration related to Mental Health Services
• Increase access to services
INNovation

Programs must be aligned with MHSA transformational values:

- Community Collaboration
- Cultural Competence
- Individual and Family-driven programs
- Wellness, Resilience, and Recovery
- Integrated Service Experience
- Outcomes-Based Program Design
INNovation

Planning:

• Programs seek to solve a persistent, seemingly intractable mental health challenge
  • Cannot be solved with simple funding
• Programs promote wellness, resilience, and recovery
• Programs developed at the grassroots, community-based level
• Includes a plan to share evaluation results and build upon success and lessons learned
