California Opioid Overdose Deaths 2015-20

Opioid Deaths

Reported Drug Overdose Deaths in California (left) & the United States (right)

Cal. June 2019-June 2020: 26.8%
USA: 21.3%

Those aged 20-34 years old died more from fentanyl overdoses than from other types of drugs. Dr. Aimee Moulin: California Bridge Project, State of Reform Jan. 2021
Sydney Kurle, State of Reform Jan. 2021
Konrad Leo Franco, CHPS
Fatal Overdose in SLO County

San Luis Obispo

Adjusted Rate of All Drug Overdose Deaths in San Luis Obispo County & California

Source: CDPH Center for Health Statistics and Informatics Vital Statistics - Multiple Cause of Death and California Comprehensive Death Files. Note: This indicator includes all overdose deaths, regardless of intent. This indicator does not include deaths related to chronic use of drugs, deaths due to alcohol and tobacco, or deaths that occur under the influence of drugs, but do not involve acute poisoning. 2019 & 2020 preliminary. Creator: Konrad Franco, California Health Policy Strategies (CalHPS)
