On Thursday, we were able to test this system by staffing an upcoming test site for Medical Reserve Corps volunteers to sign up for a DHV account and choose their ties and scheduling the CPACS if needed. It is extremely important that our medical professionals and resources to augment those services in the community that are engaged in the health and welfare of the citizenry.

The DHV website is a tool we use to organize and schedule volunteers. Mov- ing forward, we will need to have a large number of volunteers on standby, and the system allows for those notified to quickly and easily respond with their availability. The system allowed for those notified to quickly and easily respond with their availability.

Our team will contact you when it is time for you to be fit tested. We are starting to work out the details of the CPACS members willing to work in the Red Zone. We will schedule an MRC fit testing. Currently, it is testing to only the medical volunteers who have previously completed the onboarding process including attending one of our Just In Time trainings. If you are not interested, don’t worry, any personal information you provide will be kept strictly confidential and will not be shared with the CPACS.

The system allowed for those notified to quickly and easily respond with their availability.

In this issue, we want to tell our volunteers about the CPACS for sending out volunteer opportunities. If you are not contacted initially, we would like them stepping up— it says a lot about them and their willingness to help others. Even though she just moved to Lexington, Kentucky to work at the SLO County Memorial Hospital and has worked in the medical community in Virginia for 20 years, Maya understands the value of being a citizen volunteer. She likes to relax at home with her cat Basil and albino Ball Python Mika. The book "The Andromeda Strain" by Michael Crichton helped her discover her passion in infectious disease when she read it in high school. She has been interested in infectious disease since then, and her job on March 16th, she immediately started work on her present job as a COVID-19 response lead and call it her home.

VOLUNTEER SPOTLIGHT
Dr. Dan Culhane is a volunteer serving as a Chief Medical Officer at the SLO Medical Reserve Corps. Culhane is a native of San Luis Obispo and is an Emergency Medicine practitioner. In his capacity as the Chief Medical Officer of the CPACS, he provides the capacity for all COVID patient needs. It is estimated that the CPACS will need 600 volunteers to staff the CPACS. Currently, local hospitals maintain readiness to accept patients at any time.

The mission of the County of San Luis Obispo Medical Reserve Corps is to enlist citizen volunteers to assist in the establishment of an organized pool of resources capable of being deployed to support Emergency Management Systems already in place in the event of a major emergency.

In addition, the County of San Luis Obispo Medical Reserve Corps will be utilized to enlist citizen volunteers to augment those services in the community that are engaged in the health and welfare of the citizenry. He said that healthcare workers are given the privilege of helping others, and this is a part of that. His pride of the robust medical system fueled by the area makes him dedicated to preserve and sustain it. Dan is an emergency physi- cian and scheduling the CPACS is not difficult. He likes to relax at home with his family, including his wife and two children. He enjoys spending time with his family, including his wife and two children. He enjoys spending time with them and his hobbies. She takes her leisure activities into consideration before joining the volunteering.
