SUBJECT: Revised Specifications: Assessment Technician Supervisor and Assessment Technician I, II, III & IV

RECOMMENDATION: It is recommended that the Commission approve the revised Assessment Technician I, II, III & IV and Assessment Technician Supervisor job specifications as proposed.

DISCUSSION:
As part of the ongoing Specification Update Program and at the request of the Assessor’s Office, Human Resources is proposing revisions to the Assessment Technician I, II, III & IV job specification and the Assessment Technician Supervisor job specification. The last update to these specifications was in April of 1998.

These specification updates are driven by three main objectives. 1) Update minimum qualifications to more accurately describe qualifications for applicants from outside of the series as well as adding substitution options for education. 2) Update the representative duties, knowledge and skills sections to reflect the most current processes and standards in the Assessor’s office and in the field of property assessment. 3) Combine the Assessment Technician I, II, III & IV specifications into a single, consistent and comprehensive specification. Currently the Assessment Technician series is broken into four distinct specifications; Assessment Technician I, Assessment Technician II, Assessment Technician III, and Assessment Technician IV. This revision combines these four separate specifications into one unified specification. There were no changes to the Assessor’s Office organizational structure as a result of these specification updates.

Attached are track changes for each of the individual Assessment Technician specifications. The four track changed specs link to a single unified proposed specification (Assessment Technician I, II, III & IV) which is also attached. An organizational chart of the Assessor’s Office is also attached.

The department has been involved in the development of these specifications and concurs with the specifications as proposed. SLOCEA and Employee Relations have reviewed and approved the proposed specifications.
